

Case Study: BC Lottery

CHALLENGE & TEST REQUIREMENTS

- BC Lotto was seeking a partner in Quality Assurance Management and Delivery to support their testing needs with the objective of achieving maximum value. QAC brings a solution that includes thought leadership in driving testing quality, and increased efficiencies through innovation and flexible staffing arrangements.

RESULTS

- ✓ Support of Functional and Mobile app testing requirements
- ✓ Use of Reusable tools and methodologies for project management and delivery
- ✓ Access to SMEs and leading practices
- ✓ Project governance and accountability
- ✓ Flexibility in staffing
- ✓ Resource capacity without lengthy & costly change order process
- ✓ Ease of accommodating scope change
- ✓ Define and measure KPIs

SOLUTIONS & APPROACH

- End-to-end Quality Capabilities: Deliver end-to-end QA capabilities from requirements through design, development, system and automation testing, to drive system quality throughout the SDLC.
- Proven Test Automation: Test Case Analysis, Automation development framework, test tool experience, script creation, test execution, data management, and governance that deliver the right amount of automation at the right time.
- Proven Methods, Tools, and Assets: Enable innovative QA and testing methods and tools that each team can leverage to drive increased defect prevention, automation and quality earlier in the SDLC.

Investment in Skills: Significant up-front and ongoing investments in skills, tools, and technology.

- Right People, Right Price, and Right Location: Deliver value to clients through providing the right resources with the right skill sets collaborating with business teams at the right time
